WATCH AND WARNING... KNOW THE DIFFERENCE

A HURRICANE WATCH

issued for your part of the coast indicates the possibility that you could experience hurricane conditions within 36 hours. This watch should trigger your family's disaster plan, and protective measures should be initiated especially those actions that require extra time such as securing a boat, leaving a barrier island, etc.

A HURRICANE WARNING

issued for your part of the coast indicates that sustained winds of at least 74mph are expected within 24 hours. Once the warning has been issued, your family should be in the process of completing protective actions and deciding the safest locations to be during the storm.
